

I wanted to let the FCC know that I am concerned about the possibility that LPFM broadcasting may replace FM translators. This concerns me because a not for profit radio station called K-Love broadcasts using FM translators. K-Love has a positive impact on the San Antonio TX community through its message of love, and hope. This message has inspired me to be a better person and as a result a better member of society. I believe that if K-Love is taken off the air the U.S. would lose a powerful motivator for positive societal change. Please allow FM translators to be used by national and regional providers like K-Love.

Thanks for your time and consideration,  
Jared Huisinga
